

PRESS RELEASE

New partnership between sedApta and Replica Sistemi

29th November, 2017 Curtatone (MN) – Replica Sistemi and sedApta enter into a business partnership aimed at providing the manufacturing industry with advanced applications for the Supply Chain management.

Replica Sistemi is an Italian company specializing in design and development of software applications for the Logistics management since 1980. Years spent partnering with hundreds of customers allowed to create the software suite **SMA.I.L.:** - **SMART INTEGRATED LOGISTICS** which integrates WMS (Warehouse Management System) and TMS (Transportation Management System) to manage more efficiently, faster and more easily all the processes involved in the Supply Chain management, from warehousing to transportation.

sedApta is an international Group formed from the aggregation of top tech companies based in Italy, Germany, the USA and Brazil specializing in sales and manufacturing forecast and planning (Sales and Operations Planning) for the Manufacturing Operations Management through state-of-the-art systems according to topics like Industry 4.0 and technology change.

Replica Sistemi and sedApta share reliability, know-how, a constantly growing client portfolio and financial strength which made it possible through the years for both the companies to gain important achievements in the IT industry.

“Through this partnership we ensure and offer our customers and prospects a full range of technologically advanced software applications for the optimization of the whole Supply Chain. sedApta’s experience in the field, together with our expertise, will be a perfect combination for all those companies looking for trustworthy partners able to support and facilitate their growth and industrial development.” states Mr. Lorenzo Guaschino, President of Replica Sistemi.

“We’re happy to be announcing this new venture with Replica Sistemi. Thanks to many strategic collaborations during the last years, we are on the market with an advanced and complementary range of products to meet all Industry 4.0 requirements. The reliability and professionalism of Replica Sistemi represent a great value for our customers and will certainly bring us new business opportunities.” adds Mr. Giorgio Cuttica, president of sedApta Group.
